

WI is a leader in effectively establishing a strong law protecting it's consumers from annoying telemarketers. We thank those leaders who have fought for our rights and demand that this bank association or any group who attempts to weaken our No Call List be stopped. Please identify and publish those banks responsible for this action that we consumers may support those who are not acting against our best interests. If the FCC is interested in enforcing an effective, uniform NO Call LIST for the nation, it should adopt the one utilized by the State of Wisconsin.
